

Ten Years of Federal Budgets: Double Whammy for Women

Press Release

"OTTAWA - February 3, 2005 - Federal fiscal choices have done little to improve most women's economic security over the last 10 years, says the first ever analysis of federal budgets on Canadian women. The ground-breaking report, released today in Ottawa by the Canadian Feminist Alliance for International Action, tracks a decade of federal budgets. Written by award-winning economist Armine Yalnizyan, it measures the federal government's performance against the explicit commitments it made to gender equality in Beijing in 1995. It shows that massive spending cuts unduly hurt women in the deficit era and women's interests have been largely ignored since Ottawa began posting surpluses."

Canada's Commitment to Equality: A Gender analysis of the last ten federal budgets

By Armine Yalnizyan
